Vijselaar

Cross-reference table for Prysmian crane cables

Old and new range

Vijselaar currently offers both the old and new ranges of Prysmian crane cables. Would you like to know which crane cable replaces the old type? In the table below, we have clearly laid this out for you.

For each application, you can see which old type corresponds to which new type, including the technical designation. This way, you will always order the correct product, regardless of the naming convention you are used to.

The table is organized by application: MV and LV railing, spreader (vertical, basket, mobile harbour cranes), festoon (round and flat), and drum flex.

Are you unsure which type fits your installation? **We are happy to assist you.**
